

TradeX

Intelligent Trading Algorithms

TradeX

Cutting-edge AI solutions for trading

Technology

- Reinforcement Learning, the most advanced AI paradigm

Ambition

- Leading provider of RL-based solutions for trading

Offering

- RL-based trading algorithms
- AI technological advisory

WHY REINFORCEMENT LEARNING?

Plans long-term trading strategies to maximize P&L

Data-driven, no human biases

Dynamically adapts to changing market environments

Algorithms
for alpha
generation

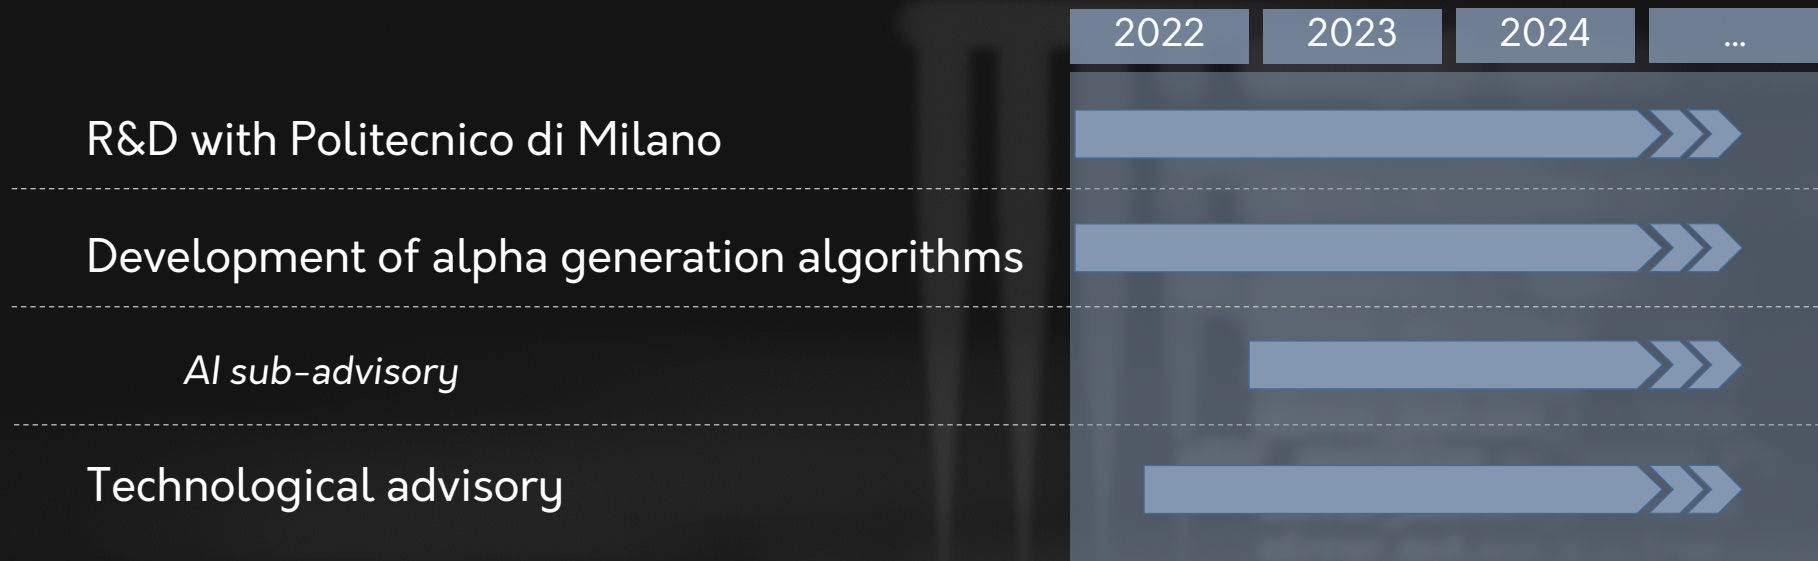

Core product

Technological
advisory

Cashflow generator

ROADMAP

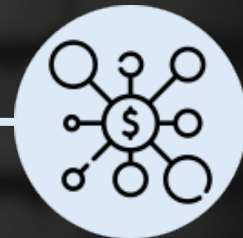

REFERENCE MARKET

\$7+
Trillion

Hedge fund and
asset management
sub-advisory

\$10+
Billion

**Algorithmic
trading**

**Diversified client
base** across
financial
institutions

Team Members

CEO, Co-founder
Edoardo Vittori, PhD

CTO, Co-founder
Lorenzo Bisi, PhD

Advisory Board

- ML professor and researchers
- Experienced Traders

Years of experience in Trading

100+ scientific publications in RL

World-renown research group
